Michael Bates July 17, 1999 confirmed
that the arabic language dates ^{appear to} read
from ~~right~~ ^{left} to ~~left~~ ^{right} because ⁱⁿ arabic when
reading numbers ~~reads of~~ the smaller
items are read first such as 5 plus
2 tens plus 8 hundreds plus 3 thousands.
this is a right to left reading even
though to the European it seems to be ~~be~~
left to right written numbers

this confirms what another
Arabic woman told me.

Lewis Journal describing Clark's horsetrade

He got what he wanted: three very good horses
in exchange for a uniform coat, a pair of
leggings, a few handkerchiefs, three knives, &
some trinkets "the whole of which did not
cost more than 20 \$ in the U. States"

from Undaunted Courage Stephen E. Ambrose
p 279 U
